NIPUNA WASALA

Full-Stack Software Developer
Full-Stack Development | Cloud Platforms | REST APIs
Melbourne, VIC 3000 | +61 422 737 889 | nipunas98@gmail.com | LinkedIn | Portfolio | GitHub
Full-time Australian work rights

PROFESSIONAL SUMMARY

Full-Stack Software Developer with 4+ years of experience delivering web applications and digital platforms across healthcare, FinTech, MarTech, and CMS environments. Experienced across the full software development lifecycle, from translating requirements into technical solutions through development, integration, testing, deployment, and ongoing delivery. Brings a strong foundation in modern frontend engineering alongside backend development, cloud services, and platform integration. Comfortable working in Agile, cross-functional environments and taking ownership of complex, high-priority initiatives. Experienced in progressing from individual software development into technical leadership, including leading frontend delivery and supporting the development of customer-facing products.

SELECTED PROFESSIONAL HIGHLIGHTS

- **Healthcare & Customer Engagement:** Built solutions supporting healthcare payment collection, installment plans, automated reminders, and customer engagement workflows involving high-volume invoice and patient-related data.
- **MarTech & Digital Analytics:** Delivered features for social listening and digital marketing platforms covering customer engagement, online conversations, sentiment, and campaign analytics.
- **Full-Stack Product Development:** Delivered end-to-end functionality across frontend applications, backend services, APIs, databases, integrations, and cloud-based platform components for customer-facing products.
- **Technical Leadership & Ownership:** Progressed into technical leadership while continuing full-stack development, leading a frontend team, taking ownership of high-priority initiatives, and collaborating closely with Product Owners and engineering teams.
- **Platform Architecture & Engineering:** Contributed to application architecture, reusable components, authentication and RBAC, CI/CD, deployment, and containerisation across multiple software products.

TECHNICAL SKILLS

- **Languages:** TypeScript, JavaScript, Java, SQL
- **Front-End:** React.js, Next.js, HTML5, CSS3, Tailwind CSS, SCSS
- **Back-End:** Node.js, Express.js, Spring Boot, REST APIs, GraphQL
- **Cloud & DevOps:** AWS, Lambda, API Gateway, S3, Amplify, DynamoDB, IAM, GitHub Actions, Jenkins, CI/CD
- **Databases:** MariaDB, MySQL, PostgreSQL, MongoDB
- **Architecture & Integration:** REST API Integration, System Integration, Authentication, RBAC, Microservices
- **Tools:** Git, GitLab, Bitbucket, Jira, Trello, Figma
- **AI Tools:** Claude Code, Gemini, Ollama, Google Stitch

PROFESSIONAL EXPERIENCE

PROCONS INFOTECH AUSTRALIA MELBOURNE, VIC
Full-Stack Developer (Consultant) August 2026 – Present

Procons Academy (PMI-USA Authorized Training Partner) – Learning Management Platform

- Advise on the technical and product direction of Procons Academy's planned expansion into the Australian market, contributing to the ongoing market entry strategy and digital platform roadmap.
- Work with Australian partners and stakeholders to research local training market requirements and evaluate opportunities for introducing PMI-aligned professional training programs.
- Assess and adapt the existing LMS, identifying opportunities to improve scalability, maintainability, and usability while developing new functionality with React and Node.js.
- Translate evolving business and product requirements into technical solutions, contributing to the platform's ongoing development and long-term product direction.

HRC LABS (PVT) LTD COLOMBO, SL
Full-Stack Developer June 2023 – July 2025

K1 (Formerly known as HRC Kollect) - Healthcare Payment & Customer Engagement Platform

- Developed and delivered end-to-end features using React, TypeScript, Node.js, MariaDB, and AWS for a healthcare payment collection and customer engagement platform.
- Built payment and engagement workflows supporting installment plans, payment plan management, SMS/email reminders, and automated scheduled processes.
- Developed backend APIs and frontend interfaces for high-volume invoice and patient-related data, working within healthcare data and security requirements.
- Contributed across CI/CD, deployment, containerisation, and Agile delivery, collaborating with cross-functional stakeholders throughout the development lifecycle.

One HRC - Unified Healthcare Platform

- Built the core frontend architecture using React, Vite, and Tailwind CSS, establishing reusable components and responsive interfaces for a unified healthcare platform.
- Developed analytics dashboards and reporting interfaces supporting operational and business workflows.
- Implemented role-based access control and Keycloak authentication/SSO, supporting secure access across platform features.
- Contributed to Spring Boot and PostgreSQL backend services, integrating frontend applications with platform services and supporting high-priority feature delivery.

ARIMAC (PVT) LTD COLOMBO, SL
Software Engineer II April 2022 – June 2023
Software Engineer I June 2021 – April 2022

Social Reach - MarTech Social Listening & Analytics Platform

- Developed full-stack features for a social listening and digital marketing platform covering customer engagement, online conversations, sentiment, and campaign analytics.
- Progressed into frontend technical leadership, leading a frontend development team and coordinating frontend delivery.
- Led a major frontend modernisation using Next.js and Tailwind CSS, developing reusable components and analytics interfaces for complex marketing and social media data.
- Worked closely with stakeholders to translate business requirements into customer-facing features and contributed to Agile planning, CI/CD, and delivery.

Sampath Bank PLC - Customer Website CMS

- Developed a custom customer-facing CMS using React and Strapi, integrating frontend applications with REST-based backend services.
- Built reusable frontend components and content-driven interfaces supporting the bank's digital presence and content workflows.
- Contributed to system integrations, maintainability, CI/CD, and Agile delivery throughout the development lifecycle.

EDUCATION & CERTIFICATIONS

CURTIN UNIVERSITY AUSTRALIA
Bachelor of Computing in Software Engineering November 2017 – March 2021

SRI LANKA INSTITUTE OF INFORMATION TECHNOLOGY SRI LANKA
Higher Diploma in Information Technology February 2018 – October 2019

AWS CERTIFIED CLOUD PRACTITIONER (CLF-C02)
View Credential June 2026 – June 2029
